

Coastal Resilience Community Workshop Series

WORKSHOP #2: STABILIZING DUNE AND BLUFF SYSTEMS

Wednesday

October 14,

5:00 - 7:00 P.M.

Bold Coast Seafood

200 Main St, Prospect

Harbor, ME 04669

Learn about various stabilization strategies for coastal dune and bluff systems and how to select an appropriate approach. Demystify the regulation and permitting surrounding shoreline stabilization projects. Explore the costs and benefits of varying stabilization methods and learn of potential funding sources for planning/design and implementation.

Intended Audience: Municipal officials and staff, committee members and volunteers, and local stakeholders including impacted property owners

HCPC and Acorn Engineering invite you to join a 3-part workshop series focused on coastal resilience planning. The full series will run through November 2026 and will provide a background on dune and bluff systems, stabilization methods, regulatory considerations and will explore practical applications through a site visit.
