Planning for Coastal Change

WORKSHOP #3: SITE VISITS

November 17th

9:00 am - 12:00 pm

Meet at Sand Cove Beach

Across from 202 Corea Road

Join Acorn Engineering and HCPC Staff for two site visits, one to the dune system at Sand Cove Beach and one to a bluff system along Beach Street in Winter Harbor. Learn specific erosion control techniques and how they can be applied to sites. Talk through stabilization options and potential plans to address coastal erosion in different systems.

Intended Audience: Municipal officials and staff, committee members and volunteers, and local stakeholders including impacted property owners

Please RSVP

Here

HCPC and Acorn Engineering invite you to join a 3-part workshop series focused on coastal resilience planning. The full series will run through November 2026 and will provide a background on dune and bluff systems, stabilization methods, regulatory considerations and will explore practical applications through a site visit.
